Evidence: Software Project Description

Create and Present Your Own App/Website

In small groups (4 members), students talk about the apps or websites of their final software projects.

Prepare this information:

- Name of the app
- Purpose
- Main functions/features
- Target Users
- Visual Style

Create and Present Your Own App/Website

Then, using Figma, Stitch etc. create the interface of your app or website (to show the homepage and a key screen).

Finally, present your project to the class (3 minutes per group) explaining the main info, the organization of the layout, the function of the buttons, menus and boxes using the target expressions and vocabulary.
